CRITERIA FOR GRANT

Eligibility is exclusively for the regular academic track, based on academic activity beyond the regular activity in teaching and research. The criteria are detailed in the website of the Academic Secretary.

Eligibility for the grant is conditional on meeting at least three criteria out of a detailed list in the declaration form.

New Teachers are allowed to meet only two of the criteria during their first four years in the institution.

The report is submitted once a year towards the beginning of the school year on the work in the past year,

The grants are paid in four payments in the months of November, February, May and August.

The grant is not given in the first year of work but rather in the second year based on the form that is completed in the second year for the previous year. At the beginning of the second year of work, one should report on the work in the first year and the grant given in the second year will be a double grant. One may request an advance at the expense of the current year in this form.

The teachers in the regular academic track are entitled to a special grant based on their academic work that is in excess of their regular work in teaching and research (“meeting the criteria”). The appropriate form is circulated to teachers each year.
